Flea Treatment Preparations:

1. Pick up floors: toys, clothes etc...
2. Thoroughly vacuum and dispose of its contents outside. Vacuuming helps eliminate eggs and larvae before treatment is performed, especially in areas where your pet sleeps
3. People and pets need to be out of the home for at least 2-4 hours

***a liquid treatment will be applied to all floors and upholstery followed by a fogging treatment**

Post Flea Treatment Procedures:

1. Make sure pets are on a treatment before they return (Advantage etc...)
2. Please make sure all flooring is dry before allowing people or pests to re-enter home
3. Do not vacuum or clean flooring for at least 24 hours after treatment
4. Once fleas are controlled you and your pets no longer need to leave the home for any re-treatments
5. Re-treatment cannot be performed for at least 21 days from the previous treatment
6. It is normal to have a resurgence of fleas after 3-5 days. Please allow 21 days for the material to properly effect the life cycle of these pests

****PLEASE NOTE: UPON ENTERING YOUR HOME, IF OUR TECHNICIAN
FEELS THE ABOVE INTRUCTIONS WERE NOT PERFORMED,
THE GUARANTEE WILL BE VOID**
